

About the TRAA

The TRAA Works at a Grassroots Level Within the Thames River Watershed to:

- Protect, enhance and regenerate a viable, multi-species, year-round fishery.
- Promote and participate in environmental clean-up, pollution control and rehabilitation.
- Breed, relocate and stock to re-establish or augment appropriate species of fish.
- Promote environmentally sound sport fishing practices.
- Form partnerships with community businesses, government agencies, special interest groups, landowners, and other stakeholders in the Thames River watershed.
- Increase public awareness of the unique diversity of the Thames River Watershed, its challenges, its recreational opportunities and its vital importance to our community.

This is what sets the TRAA apart from other clubs and organizations. You'll find us right in the water clearing obstructions from streams, measuring returning salmonids & taking scale samples for DNA analysis, education through trout hatchery tours & stream walks, being a voice for the Thames River watershed & its inhabitants and the list goes on.
